Three small ideas, built from NORA's own objects.

OPEN: BLAKE APPROVES BEFORE ANY ENTERS THE SYSTEM

01 · The Prism

The case's triangular profile, drawn as a hairline. A marker, never a logo.

—/333

02 · The Numeral

The edition number as the headline. The dash stands for the number not yet given.

03 · The Hairline

The rule from the lockup, used as the one line in every layout. Everything hangs from it.

The case folds flat.

SABAE, JAPAN

DEVICE 01

The Prism

The leather case is a triangular prism. Its end profile becomes a single hairline triangle: the brand's one shape.

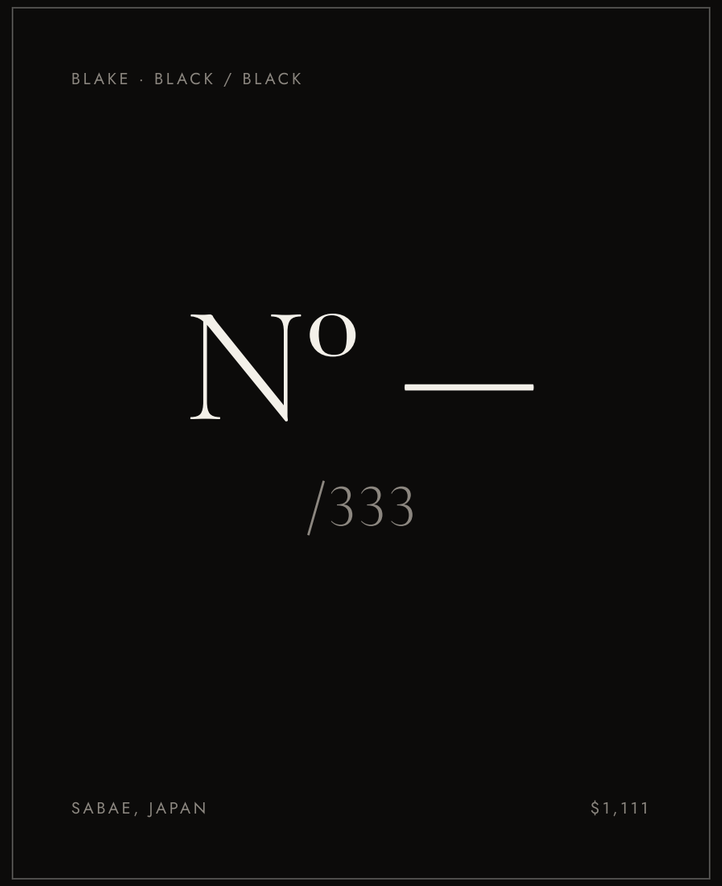

Section marker in the guidelines and on the site

Instagram story highlight icons (with the monogram)

A blind-debossed seal on the box sleeve

Never filled, never with the logo inside it

OPEN: EXACT TRIANGLE PROPORTIONS COME FROM THE CASE SKETCHES, NOT YET SUPPLIED

DEVICE 02

The Numeral

Every pair carries its number inside the temple. The number system becomes the headline: "Nº —/333" before launch, a real number only on the authenticity card.

333	Nº 001/333	—/333
	SAMPLE	

REAL EDITION NUMBERS NEVER APPEAR IN MARKETING. "N° 001/333" IS USED ONLY AS A LABELED SAMPLE.

Three styles.
333 of each.

2027

DEVICE 03

The Hairline

The rule that separates monogram and wordmark becomes the structure of every layout. One line, always the same weight, sitting at the golden section. Headlines rest on it; labels hang below it.

Instagram feed: the same line height in every post builds a quiet grid

Stationery, the authenticity card, the site header

One per layout. Never decorative boxes or double rules
